FLAUTI & FLAUTINI

Flauti è la collezione di listelli per rivestimento in gres smaltato concepita da Ceramica Vogue per caratterizzare lo spazio architettonico attraverso una struttura in basso rilievo.

La sua disposizione randomica su rete è in grado di riflettere la luce in modi sempre diversi, conferendo un continuo "movimento" alle pareti su cui è posata.

La collezione include listelli concavi, convessi e flat nei formati 5x20 cm e 5x40 cm, montati miscelati su rete 30x40 cm. È disponibile in una gamma di colori e finiture che permette di interpretare diversi contesti progettuali, dagli interni residenziali e commerciali fino ai rivestimenti di facciata, in continuità con una tradizione architettonica tipicamente italiana. Soluzioni customizzate consentono inoltre la creazione di schemi di posa e mix cromatici personalizzati.

A completare la gamma, Flautini, un listello più compatto da 2,5x20 cm, anch'esso montato su rete 30x40 cm. Questo formato sottolinea la vocazione decorativa della collezione e amplia le possibilità compositive, consentendo di creare dettagli raffinati e superfici articolate. Disponibile in 6 colori lucidi, si presta a soluzioni creative per il mondo retail, hospitality e residenziale, garantendo le stesse prestazioni tecniche del gres smaltato e confermando la versatilità della collezione.

Con Flautini, la famiglia Flauti offre così uno strumento progettuale completo, capace di interpretare lo spazio contemporaneo con carattere e personalità.

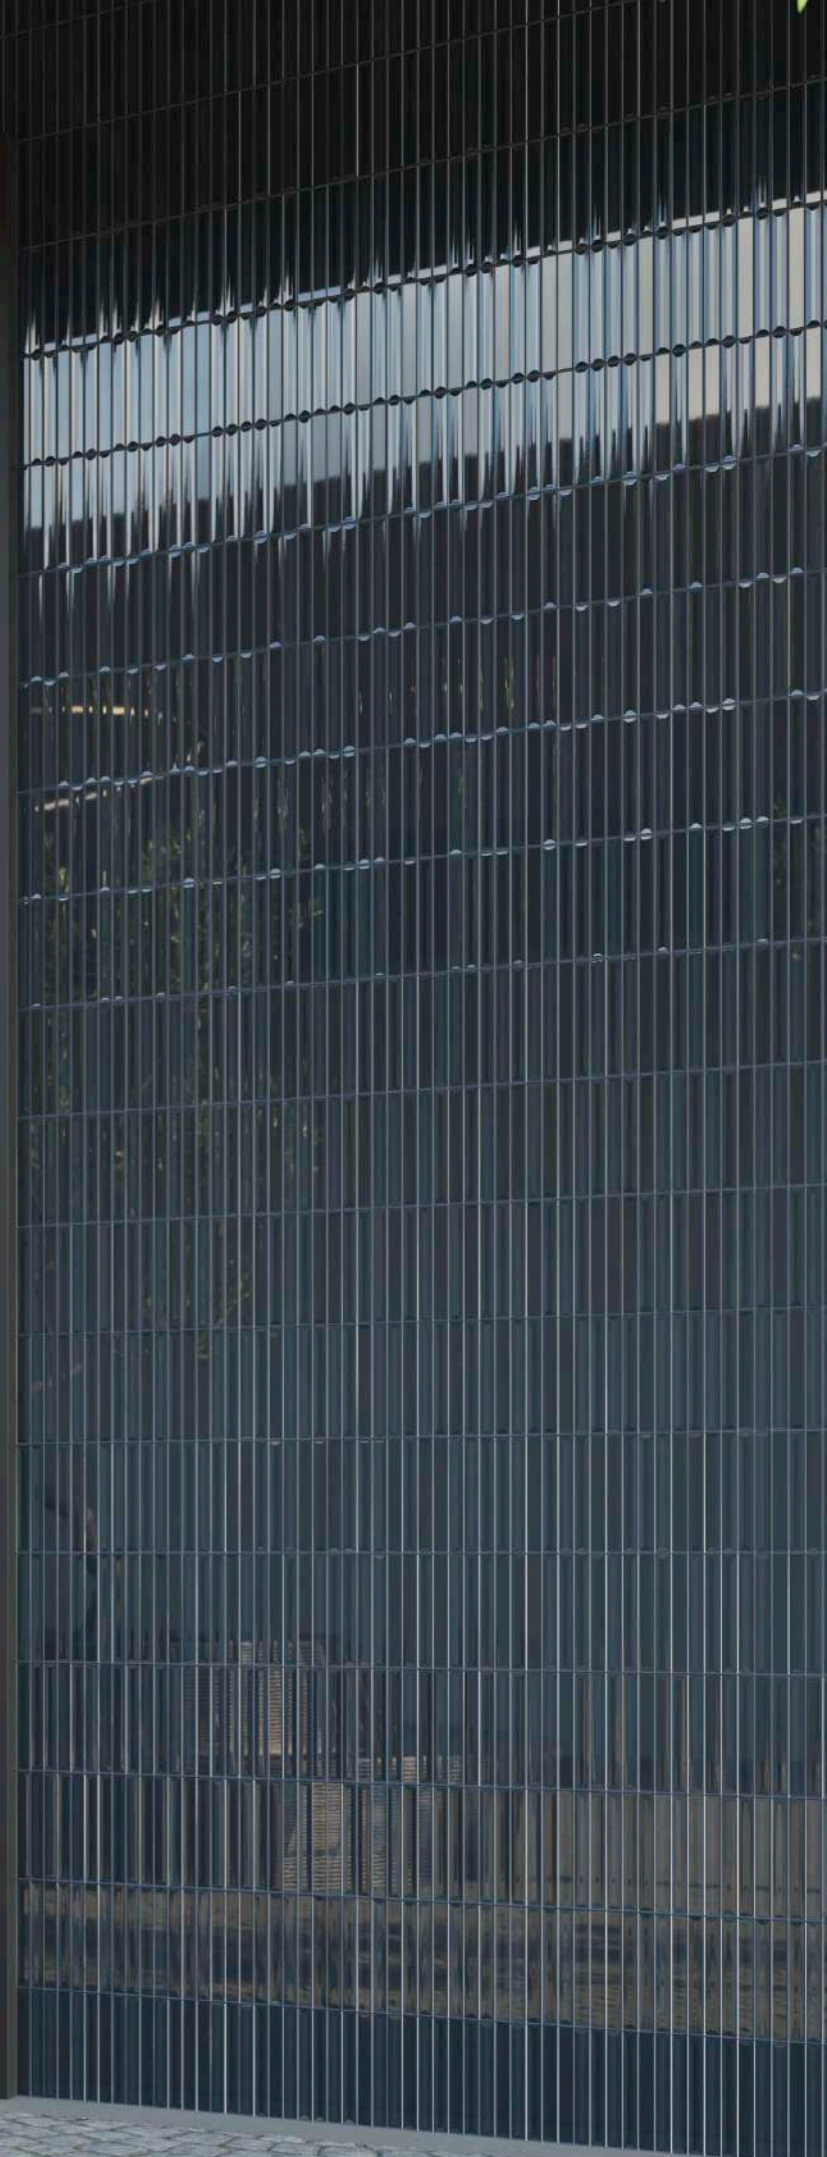

Flauti is the stoneware listels collection for cladding, designed by Ceramica Vogue to feature the architectural space through a bas-relief structure.

It's random mesh mounted supplied makes light reflecting in different ways giving thus a sort of "movement" to the walls.

The collection includes concave, convex and flat strips in 5x20 cm and 5x40 cm sizes, mounted in mixed compositions on a 30x40 cm mesh. It is available in a wide range of colors and finishes, making it suitable for different design contexts— from residential and commercial interiors to façade cladding—in continuity with a typically Italian architectural tradition. Customized solutions also allow the creation of bespoke laying patterns and personalized color mixes.

Completing the range is Flautini, a more compact strip measuring 2.5x20 cm, also mounted on a 30x40 cm mesh. This format emphasizes the decorative character of the collection and expands compositional possibilities, enabling the creation of refined details and articulated surfaces. Available in 6 glossy colors, it lends itself to creative applications in retail, hospitality and residential spaces, while ensuring the same technical performance of glazed stoneware and confirming the versatility of the collection.

With Flautini, the Flauti family becomes a complete design tool, capable of interpreting contemporary spaces with character and personality.
